

Real Estate Success Series

Coverage is King - Avoid the Service Challenges of Weak or No WiFi or Cellular Signals

In-Building Wireless Solutions

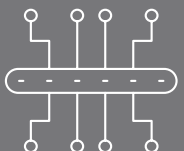

Increasing adoption of robotics, IoT, Edge compute, and Virtual Reality solutions are placing an ever-increasing demand on already-limited wireless networks. With a unique combination of technology and marketing know-how, your ANDX experts will work with you to design, launch and execute the technology solution and service plan that fits your requirements.

- ▶ Extend coverage to hard-to-reach areas – indoor, basement, and outside
- ▶ Minimize weak signals, spotty coverage, and latency
- ▶ Enable IoT and Workflow Management
- ▶ Reduce cost through a Telecommunications Expense Management audit and carrier-agnostic solutions, using savings to upgrade infrastructure

Ask how ANDX's infrastructure solutions increase coverage and reduce TCO while increasing coverage, reliability, scalability and performance.

Tailor-Made Managed Services Support for:

- ▶ WiFi
- ▶ Distributed Antenna Systems (DAS)
- ▶ Small Cell
- ▶ Private Wireless
- ▶ Beacons
- ▶ IoT
- ▶ Point to Point Wireless
- ▶ 5G MEC
